

This screenshot shows a 'Contact Information' form with a purple header and a white body. The form contains four input fields: 'Full Name' (Rakesh's Team), 'Email Address' (rakesh.harilingam@gmail.com), 'Confirm Email' (rakesh.harilingam@gmail.com), and 'Phone Number' (7386775677). Each field has a green checkmark and the text 'Looks good!' below it. A blue 'Submit' button is at the bottom. A green box at the bottom of the form says 'Form submitted successfully!'. To the right, a white box titled 'Validation Rules' lists four rules: 'Email must be valid (e.g., user@example.com)', 'Emails must match', 'Phone must be 10 digits', and 'Name must not be empty'. A tooltip at the top right says 'To exit full screen, move mouse to top of screen or press and hold Esc'.

Contact Information
Please enter your valid contact details

Full Name
Rakesh's Team

Email Address
rakesh.harilingam@gmail.com
✓ Looks good!

Confirm Email
rakesh.harilingam@gmail.com
✓ Looks good!

Phone Number
7386775677
✓ Looks good!

Submit

✓ Form submitted successfully!

Validation Rules

- Email must be valid (e.g., user@example.com)
- ✓ Emails must match
- Phone must be 10 digits
- Name must not be empty

To exit full screen, move mouse to top of screen or press and hold Esc

This screenshot shows the same 'Contact Information' form, but with validation errors. The 'Full Name' field is 'Rakesh'. The 'Email Address' field is 'rocky@.com' with a red error message 'Please enter a valid email address.' below it. The 'Confirm Email' field is 'rocky@gmail.comm' with a red error message 'Email addresses do not match.' below it. The 'Phone Number' field is '73057377023' with a red error message 'Please enter a valid 10-digit phone number (e.g., 8498334314).' below it. The 'Submit' button is still blue. The 'Validation Rules' box on the right is the same as in the first screenshot.

Contact Information
Please enter your valid contact details

Full Name
Rakesh

Email Address
rocky@.com
Please enter a valid email address.

Confirm Email
rocky@gmail.comm
Email addresses do not match.

Phone Number
73057377023
Please enter a valid 10-digit phone number (e.g., 8498334314).

Submit

Validation Rules

- Email must be valid (e.g., user@example.com)
- ✓ Emails must match
- Phone must be 10 digits
- Name must not be empty

This module comprises a responsive, client-side validated "Contact Information" form designed to ensure high data integrity prior to backend submission. The implementation prioritizes user experience through real-time, dynamic feedback mechanisms and a clean, modern aesthetic.

Step 1: Implement the Visual Design (styles.css)

This CSS will generate the purple gradient background, the split-pane layout, and the dynamic state colors (red for errors, green for success) seen in your mockups.

Paste the following code into your styles.css file:

```
# styles.css X
# styles.css >
1  * {
2    margin: 0;
3    padding: 0;
4    box-sizing: border-box;
5  }
6
7  body {
8    font-family: 'Segoe UI', Tahoma, Geneva, Verdana, sans-serif;
9    min-height: 100vh;
10   display: flex;
11   align-items: center;
12   justify-content: center;
13   background: linear-gradient(135deg, #667eea 0%, #764ba2 100%);
14   padding: 20px;
15   position: relative;
16   overflow-x: hidden;
17 }
18
19 .background-gradient {
20   position: fixed;
21   top: 0;
22   left: 0;
23   width: 100%;
24   height: 100%;
25   background: linear-gradient(135deg, #667eea 0%, #764ba2 50%, #f093fb 100%);
26   z-index: -1;
27   animation: gradientShift 15s ease infinite;
28 }
29
30 @keyframes gradientShift {
31   0%, 100% {
32     background: linear-gradient(135deg, #667eea 0%, #764ba2 50%, #f093fb 100%);
33   }
34   50% {
35     background: linear-gradient(135deg, #764ba2 0%, #f093fb 50%, #667eea 100%);
36   }
37 }
```

Step 2: Implement the Validation Logic (validator.js)

This script utilizes the external validator.js library (which is already linked in your HTML <head>) to check the inputs in real-time.

Paste the following code into your validator.js file:

```
JS validator.js X
JS validator.js > FormValidator > constructor
6
7 class FormValidator {
8   constructor() {
9     this.form = document.getElementById('myForm');
10    this.inputs = {
11      name: document.getElementById('name'),
12      email: document.getElementById('email'),
13      confirmEmail: document.getElementById('confirmEmail'),
14      phone: document.getElementById('phone')
15    };
16
17    this.errorElements = {
18      name: document.getElementById('nameError'),
19      email: document.getElementById('emailError'),
20      confirmEmail: document.getElementById('confirmEmailError'),
21      phone: document.getElementById('phoneError')
22    };
23
24    this.successElements = {
25      email: document.getElementById('emailSuccess'),
26      confirmEmail: document.getElementById('confirmEmailSuccess'),
27      phone: document.getElementById('phoneSuccess')
28    };
29
30    this.buttons = {
31      submit: document.getElementById('submitBtn'),
32      successAlert: document.getElementById('successAlert'),
33      errorSummary: document.getElementById('errorSummary'),
34      errorList: document.getElementById('errorList')
35    };
36
37    this.validationRules = {
38      name: [this.validateName.bind(this)],
39      email: [this.validateEmail.bind(this)],
40      confirmEmail: [this.validateConfirmEmail.bind(this)],
41      phone: [this.validatePhone.bind(this)]
42    };
43  }
```

Step 3: Execute and Test

1. Ensure all three files (index.html, styles.css, validator.js) are saved in the same folder.
2. Double-click index.html to open it in your web browser (Chrome, Firefox, or Edge).
3. Test the form by leaving fields blank, entering mismatched emails, or typing an 11-digit phone number to verify the real-time error states are firing accurately.

```
index.html X
index.html > ...
1  <!DOCTYPE html>
2  <html lang="en">
3  <head>
4    <meta charset="UTF-8">
5    <meta name="viewport" content="width=device-width, initial-scale=1.0">
6    <title>Form Validation - Enhanced UI</title>
7    <link rel="stylesheet" href="styles.css">
8    <script src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.9.0/validator.min.js"></script>
9  </head>
10 <body>
11   <div class="background-gradient"></div>
12
13   <div class="container">
14     <div class="form-wrapper">
15       <div class="form-header">
16         <h1>Contact Information</h1>
17         <p>Please enter your valid contact details</p>
18       </div>
19
20       <form id="myform" class="form-content">
21         <!-- Name Field -->
22         <div class="form-group">
23           <label for="name">
24             <span class="label-icon">👤</span>
25             Full Name
26           </label>
27           <div class="input-wrapper">
28             <input
29               type="text"
30               id="name"
31               name="name"
32               placeholder="Enter your full name"
33               required
34             >
35             <span class="input-status"></span>
36           </div>
37           <span id="nameError" class="error-message"></span>

```
